Smelter Operations Rönnskär  
Skelleftehamn  
SE-Sweden.

ATT Mr. Stanislaw Halarewicz  
General Manager.  
ANCOR-HMG-EUROPA  
GLOGOW  
POLAND

**Subject. Letter of recommendation.**

Boliden have during 1998 purchased and installed one section of cells in our refinery. One section consists of 28 cells. After a visit 1996 at KGHM Copper Smelter and with their good references for ANCOR cells we took the decision to do this installation.

The cells are produced at ANCOR-HMG- EUROPA Company in GLOGOW POLAND.

ANCOR-HMG-EUROPA could stand up for our specific demands for design, measures and tolerances. All our requested and specific demands was fulfilled within the deliverance.

The delivery was in good time and the erection was carried out with skilled professional staff within a pressed time schedule.

After 6 months operation without any problems we now are assuming that these high quality products from ANCOR-HMG-EUROPA will give us 15 years or more with operation in our refinery without problems.

As a conclusion BOLIDEN has an opinion that products manufactured by ANCOR-HMG-EUROPA well can be taken in consideration for future replacement or expansion projects.

Best regards

Stig Larsson.  
Project Manager Electrolysis.
